**DETAILED ACTION (10/732,764)**

***Remarks***

1. This office action is in response to the amendment filed on 08/26/2008.
2. Claims 18 and 19 have been cancelled by the Applicants
3. Claims 1-17 and 20-23 remain pending and now being allowed (re-numbered as claims 1-21)

***Allowable Subject Matter***

4. Claims 1-17 and 21-23 are allowed. As Applicants point out in the Appeal Brief filed on February 22, 2008, the closest cited prior art of Fogel (Fogel et al., "Open Source Development with CVS 3<sup>rd</sup> Edition), does not teach, show or so much as suggest the steps of (1) identifying a program construct having the edited source code; (2) constructing a construct list of at least one other construct having derived and/or related code to the program construct; (3) comparing the at least one other construct with the program construct having the edited source code; and (4) if, in response to comparing the at least one other construct with the program construct, a commonality between the at least one other construct and the program construct is found to be equal to or beyond a threshold of similarity, then notifying a user responsible for the at least one other construct that the source code of the program construct has been edited as claimed in claim 1. Another closest cited prior art of Bloom (Delwin W. Bloom US 3,711,863), Bloom

does not disclose/teach the use of weights, tokens, threshold of similarity and constructs. More specifically, Bloom does not teach the steps of (1) identifying a first construct; (2) parsing  $N$  tokens of the first construct,  $N$  being a positive integer; (3) identifying a plurality of other constructs in the repository; (4) parsing  $M$  tokens of each one of the other constructs, where  $M = N$ ; (5) comparing the  $M$  tokens of each one of the other constructs with the  $N$  tokens of the first construct; (6) determining a weight for each one of the  $N$  and  $M$  tokens based on name, type, and/or representation; (7) summing the weights of the  $N$  and  $M$  tokens; (8) determining whether the sum of the weights of the  $M$  tokens meets or exceeds a threshold of similarity, the threshold of similarity being based on a percentage of the sum of the weights of the  $M$  tokens to the sum of the weights of the  $N$  tokens; and (9) identifying each construct whose sum of the weights of the  $M$  tokens meets or exceeds the threshold of similarity as being related to the first construct as in the claimed invention.

In as such manners as recited in independent claims 1, 10, 11, 16 and each of the dependent claims are allowable for at least the same reasons.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
